The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. The current performance may be higher or lower than the performance data quoted. Performance current to the most recent month end can be obtained at www.yacktman.com or by calling 1-800-525-8258. The fund imposes a 2% redemption fee on shares sold within 30 days or less after purchase. Performance data does not reflect these redemption fees and if reflected returns would be lower.

Disclosures

Beta is a measure of the portfolios sensitivity to the market. The Price to Earnings (P/E) Ratio reflects the multiple of earnings at which a stock sells. The Standard and Poor's 500 Index (S&P 500) is a widely recognized, unmanaged index of common stock prices that includes the reinvestment of dividends, but does not include adjustments for brokerage, custodian and investment management fees. One cannot invest directly in an index.

Mutual fund investing involves risk. Principal loss is possible. Investments in smaller companies involve additional risks such as limited liquidity and greater volatility.
